Our Youth are At-Promise, Not At-Risk

EVENT HOSTS:

We envision a city where juveniles are embraced and provided with positive opportunities throughout the City of Atlanta; a place where young people view police and public institutions as partners, have full access to an excellent education, premier health and social services and a community untroubled by violence. Our dedication to the At-Promise model will help create pathways to success for youth in Atlanta and reduce the number of young people who negatively experience the criminal justice system.
